

HYDROTEK™

BY **PORTACOOOL**.

Experience the future of cooling with HydroTek™ by Portacool.

HydroTek™ evaporative media sets a new standard in evaporative media technology, engineered to deliver superior airflow and maximize cooling efficiency. Crafted from premium materials, HydroTek™ powers your Portacool with unparalleled cooling performance, keeping you cool, comfortable, and in control, even in the most extreme conditions.

ENHANCED AIRFLOW FOR GREATER COOLING POWER

HydroTek's innovative design improves airflow and velocity, increasing cooling efficiency. Maximize your evaporative cooler's performance with HydroTek™ media for superior cooling results.

EXPANDED SURFACE AREA FOR OPTIMAL COOLING

HydroTek's proprietary design increases media surface area, maximizing water evaporation and boosting cooling performance. Achieve unmatched efficiency and maintain optimal temperatures with HydroTek™ media.

SUPERIOR MATERIALS FOR ENHANCED COOLING

HydroTek™ media is built with reinforced cellulose fibers and specialty resins, delivering exceptional cooling and absorption. Experience optimal temperature reduction and improved efficiency with HydroTek™ media.

DURABLE EDGE-COAT FOR LASTING PERFORMANCE

Experience enhanced durability with HydroTek™ evaporative media's edge-coat technology, which repels algae and guards against UV damage for reliable, low-maintenance performance in tough environments.

ENHANCED PERFORMANCE

HydroTek™ evaporative media's design reduces debris accumulation, preventing clogging and ensuring optimal performance.
